- Helped mitigate and resolve issues by analyzing situation and implementing appropriate solutions.
- Managed team members and delegated tasks effectively.
- Provided regular feedback to team members on their performance.
- Fostered positive work environment to encourage productivity.

BRANDON THOMPSON

DATA STUDENT

TO WHOM IT MAY CONCERN,

My name is Brandon and I'm contacting you today because I KNOW that I would be a perfect fit for your team! I am an extremely quick learner and diligent worker and can become one of your top employees in no time. Now I don't just say this lightly, but from actual experience working in a wide variety of fields. Not only do I assimilate quite easily, but in a short amount of time, will excel. I take pride in the work I do and the image I portray, hopefully inspiring others along the way. When I am tasked with a problem, I stay focused until that problem is solved – from start to finish. Accuracy and efficiency are my top priorities; however I am able to adjust according to the task at hand. I have a passion for knowledge and have no issue asking questions - I will always get to the bottom of any situation. I confident I can consistently excel because of my physical/social awareness and attention to detail. I can often solve a problem before it even arises - often saving headaches and, more importantly, money. Basically, I'm a research nut. I genuinely enjoy learning and knowledge is something I always strive to constantly attain. There have been many situations where I lacked the relevant know-how for a specific task and had to learn new skills on the fly. This, is where I thrive. I have 100% confidence in my ability to complete my job efficiently, more often than not, exceeding expectations. My goal is to instill that same trust in you! I have a wealthy amount of experience with jobs in almost any area (labor wise) and have seen it all. I am flexible and adaptable - able to work both independently and with a team. Being both attentive and empathetic allows me to connect with clients and customers, creating a secure and friendly dynamic. I guarantee as a team member, I will not disappoint!

I have a few years of self-taught experience with software such as Microsoft Excel and Google Sheets, and some experience using python and SQL for various projects (you can find some of my projects on my website). Currently, I am still early on my path in Computer Science. My goal is to acquire a wealth of knowledge in the field, providing me the ability to create whatever I can dream of. Because of my two other passions (Currency Trading and Astrophysics), my goal is to create intelligent bots and algorithms to leverage in finance and data. I once heard Elon Musk mention "physical and informational theory", and how knowledge in those areas would prove extremely useful in the near future. This stuck with me, as these are the two things I have been interested in for as long as I can remember. But now that I have a "label" for these trains of thought, I will achieve my vision. At the very moment, I'm looking for a part time position to support me during my studies. My classes are from Monday to Thursday, so I am available from Friday to Sunday. If you have any questions, please feel free to reach out to me at bthompson_1@outlook.com, where we can arrange a time to speak and/or meet. I appreciate your time, and I encourage you to contact me as I'm sure you will be more than satisfied with my addition to the team. I look forward to hearing from you!

SINCERELY,

A stylized, handwritten signature in black ink, appearing to read 'Brandon Thompson'.
